

IN-STOCK PACKAGING

We are an American packaging company that has been actively providing high-quality packaging solutions to global beauty and skincare brands since 2006.

With our headquarters in Florida and our own manufacturing facility in China, we offer our clients the best of both worlds - by operating locally, we are better able to communicate with you and understand your markets, while having an overseas manufacturing facility allows us to offer better quality and better production times at better prices.

OUR PROMISE

We prioritize excellent customer service and prompt communication, we are always open and honest about what can and cannot be done, we will never promise something we cannot deliver, and we ensure that we always act in the best interests of our clients.

OUR PRODUCTS

We offer both stock and custom packaging products. Our stock products are carefully curated and kept on-hand in our Ft. Lauderdale warehouse, while our custom products can be made, finished, and printed to meet the unique look of your brand.

STOCK PACKAGING

Our stock packaging is perfect for brands of all sizes that are looking for stylish yet affordable packaging solutions.

We keep a large inventory of carefully-selected stock items to meet our customers' style, quality, and compatibility needs. They are all available to ship immediately from our warehouse.

CAREFULLY CURATED

Our team monitors the marketplace to identify packaging trends, and then carefully selects the most up-to-date and popular items to add to our stock packaging collection.

LOCATED IN THE USA

All of our stock items are kept at our warehouse in Fort Lauderdale, Florida. This means that all items are ready to ship as soon as they're ordered, and reduces shipping cost, time, and complexity.

LOW COST / LOW MINIMUMS

Our stock items are available by the case, and don't come with the setup and tooling costs of our custom products. This means they're perfect for newer and smaller brands, or for brands that don't yet need a fully custom product.

CUSTOM PACKAGING

We know that one of the keys to your success is being able to stand out in a crowded marketplace. To help you do this, and to help create a look that is unique to your brand, we offer a full range of customization options for your packaging.

TOOLING

We offer a US-based engineering team and support for quick design, unit tooling or mass production tooling. We have a deep knowledge base and long history in the industry, so we can support your team and bring added value and innovation to your projects.

MATERIALS

From thin wall to thick wall, our materials knowledge, coupled with our history and experience in the packaging industry, allows us to guide you to not only the lowest cost materials, but to also assist in finding material options for everything from decoration considerations to chemical resistance issues.

DECORATION

We offer a full range of printing options, including silk screening, offset printing, water and heat transferring, hot and foil stamping, U/V coating, and laser etching. We also offer many different finishing options for you to choose from, including in-mold color, inner and outer sprays, metallization, embossing and debossing, and spray finishes like pearl, matte, soft touch, glossy, and frosted.
